# My work

Guto Carvalho

## What am I doing right now?

I'm helping several private sector players to convert their applications to Cloud Native/K8S. I work mostly on the Dockerfiles, Helm Packages, CI/CD Pipelines, kubernetes deployments, management of the kubernetes clusters and the cluster integration with other stacks like Monitoring/Metrics, ChatOps and more.

## What they achieve ?

- > Better Lead time and MTTR
- > Team autonomy via automation
- > More visibility of their operations
- > More control of the APP Life Cycle
- > More space and time to think in innovation
